CHIRANTHAN S

Shivamogga, Karnataka, India | +91 9620978462 | chiranthanchiru077@gmail.com
linkedin.com/in/chiranthan-s07 | github.com/chiranthans07 | Portfolio

Professional Summary

Information Science and Engineering undergraduate (CGPA 8.15, graduating 2027) with working knowledge of Data Structures, Algorithms, Operating Systems, DBMS, Computer Networks and AI/ML fundamentals. Python is my primary language, alongside SQL, C and HTML, used in projects spanning analytics, computer vision and automated trading. 2nd Place at Insight 2026 Mini Hackathon and recipient of INR 10,000 innovation funding. Quick learner, open to a wide range of technology roles.

Education

Bachelor of Engineering – Information Science and Engineering 2023 – 2027
Jawaharlal Nehru New College of Engineering (JNNCE), Shivamogga CGPA: 8.15/10

Pre-University – Science (PCMCS) Percentage: 90.5%
Pace Ultra Modern PU College, Shivamogga

Technical Skills

- **Programming Languages:** Python, C, SQL, HTML
- **Core CS:** Data Structures, Algorithms, Object-Oriented Programming (OOP), Operating Systems, DBMS, Computer Networks, REST APIs
- **Databases:** MySQL, Oracle SQL
- **AI/ML & Data Libraries:** Machine Learning Fundamentals, Scikit-learn, Pandas, NumPy, Matplotlib
- **Tools:** Git, GitHub, Tableau, Microsoft Excel
- **Cloud:** AWS (foundational)

Projects

FinSight 360 – Banking Risk Analytics Platform | Python, MySQL, Tableau

- Built a Python and SQL pipeline that cleans, joins and analyzes synthetic banking datasets covering transactions, branches and fraud alerts.
- Shipped Tableau dashboards that replace manual reporting with views of branch performance, customer activity and fraud patterns.

HoloGuide – AI-Driven Assistive Smart Cap | Python, Raspberry Pi 4, YOLOv3-tiny

- Built real-time object detection on a Raspberry Pi 4 using YOLOv3-tiny, running on an embedded assistive wearable.
- Integrated light and temperature sensors with the detection pipeline and debugged hardware–software integration issues.

Autonomous Stock Trading Bot – MANTHAN 2026 | Python, Kafka, REST API

- Built, as part of a team in a 24-hour hackathon, a trading system that consumed a real-time market data stream via Kafka and placed orders through a REST API under a 3–4 second decision window.
- Collaborated on system design, risk handling, and strategy logic within the 24-hour delivery timeline.

AI Resume Analyzer | Python, NLP

- Built an application that extracts candidate skills and scores resume compatibility against job descriptions using keyword extraction and text analysis.

Other projects: Smart Robo Nurse (team of 4, post-surgery patient monitoring concept)

Achievements

- **2nd Place, Insight 2026 Mini Hackathon:** delivered a working prototype under time constraints.
- **INR 10,000 NewGen IEDC Innovation Funding** awarded for the HoloGuide AI-driven assistive smart cap prototype.
- **Participant, MANTHAN 2026 (24-hour hackathon):** built an autonomous trading bot as part of a team.

Certifications

- Fundamentals of Machine Learning and Artificial Intelligence – AWS Training and Certification, Jul 2026
- Data Analyst Skill Path: Zero to Hero in Excel, SQL and Python – Udemy, Oct 2026
- Career Essentials in Data Analysis – Microsoft & LinkedIn, Sep 2025 | Data Analytics Job Simulation – Deloitte, Aug 2025
